0 Introduction: Lotteries: from a ludicrous idea to a plausible one	1
0.1 Non-market distribution and randomisation	
0.2 Review of the uses of random distribution	
0.3 Previous analyses of random distribution:	
0.4 Examples of random distribution: A case-study approach	
Chapter 1. Tragic Random Choices:	11
1.1 An example of a urgent allocation: Medical treatment	
1.2 Administrative allocation: What's the alternative (to coin-tossing)?	
1.3 Elicitation and Prospect Theory	
1.4 Public Choice Theory and General Welfare	
1.5 Conclusion: Is Random Distribution the right response here?	
Chapter 2. Sporting Chances	25
2.1 Example of a random distribution: Wimbledon tickets	
2.2 Commentary on the Wimbledon Championships ticket ballot:	
2.3 Theory of rent-seeking and Sporting Chances	
2.4 Is a Lottery Better than Queuing?	
2.5 Conclusion	
Chapter 3. Glittering Prizes for Merit	35
3.1 An example of random distribution: University entrance	
3.2 Comment on Entry to popular university courses in the Netherlands	
3.3 Educational Selection on Merit: the Ideal?	
3.4 Consumer Choices	
3.5 Conclusion: What would a valid test of merit be like?	
Chapter 4. Lucky Numbers—Nice Business	53
4.1 An example of random distribution: Directory Enquiries numbers	
4.2 Discussion on Directory Enquiries numbers lottery	
4.3 Theory on Design of Economic Mechanisms: Roth and Binmore	
4.4 Conclusion: How best to dispose of public property	
Chapter 5. Fortunes in the Organisation	61
5.1 The <i>lungang</i> —an example of sacking by lottery	
5.2 Discussion on the <i>lungang</i>	
5.3 Information Theory: How much can an employer know?	
5.4 Consequences of human judgement: discrimination and the law	
5.5 Conclusions: the case for randomisation	

	<i>Page</i>
Chapter 6. Fair Shares in the Common Wealth	78
6.1 Sharing earning power in the community: The Cavil	
6.2 Discussion: The Cavil as an evolved institution	
6.3 The costs and benefits of the Cavil	
6.4 Theory to explain the success of the Cavil: Inter-personal comparison	
6.5 Conclusion	
6.6 Appendix: The <i>padu</i> —sharing community fisheries	
 Chapter 7. A Stake in Democracy—citizenship and society	 97
7.1 The US Diversity Immigrant Program—the Green Card Lottery	
7.2 Discussion on the Green Card lottery	
7.3 Theory: Justice —the highest ideal	
7.4 Theory: Fairness in the wider community	
7.5 Conclusions random as fair hence just	
 Chapter 8. Why Random Distribution Works	 107
8.1 Review	
8.2 Mostly it’s about designing an economic mechanism	
8.3 Does it work?	
8.4 Does Random Distribution work well: For whom?	
8.5 Works well for whom: Efficiency	
8.6 Works well for whom: Reciprocity and Inter-personal Comparison	
8.7 Works well for whom: Justice and Fairness in Society	
8.8 Works well overall: Stability, Accountability and Rotation	
8.9 Conclusion: A plausible idea?	
 Chapter 9: Where Next to Cast Lots:	 129
9.1 Developing the case for random allocation	
9.2 Develop a standard economic model	
9.3 US university housing lotteries	
9.4 University entrance in the UK	
9.5 Employment: Randomised short-listing	
9.6 Advocacy: Selling the Idea of Random Distribution	
 Appendices	
A How Merit evolved	141
B Measuring Happiness: An Example	150
